About Geo Engine GmbH

www.geoengine.de

Background

- Start-up of the University of Marburg, Germany
- EXIST Research Transfer funding
- Research in computer science, (web) GIS, biodiversity and remote sensing

Services

- Development of data portals
- Data access via browser, OGC-APIs and Jupyter Notebooks
- Data products as SaaS

Team

Q Search

Mixed

Raster Vector Join
Attach raster values to multi-point data

Plots

Basic Statistics
Get statistics for raster layer

Box Plot
Box plot your data

Class Histogram
Create a class histogram from categorical vector or raster data

Histogram
Create a histogram from vector or raster data

Scatter Plot
Scatter plot your data

Temporal Feature Attribute Plot
Create a multi line chart over the attribute values of a feature layer

Temporal Raster Mean Plot
Create an area chart over the mean pixel values of the images of a raster time series

Raster

Convert Raster Data Type
Converts (casts) the raster type

Expression
Calculate an expression on a raster

Interpolation
Interpolates raster data

Temporal Raster Aggregation
Aggregate raster time series

-  Sentinel 2 Band 08
-  Sentinel 2 Band 04

Raster

Select input Raster

Input A

Sentinel 2 Band 04

Input B

Sentinel 2 Band 08

Configuration

Specify the operator

Use A to reference the existing pixel of the first raster, B for the second one, etc.

```
1 fn(A, B) {  
2   (A - B) / (A + B)  
3 }
```

Output Data Type *

Float 32

Map No-Data with expression

Output Name

Specify the name of the operator result

Output Layer Name

Outlook: AI Integration

Summary & Outlook

Summary

- Geo Engine as a geoprocessing system
 - Processing engine is open-source
 - Time series processing
 - Automatic harmonization
 - Reusable workflows
- Work in different environments
 - User Interface
 - Jupyter Notebook
- Flexible system for applications
 - Data portals (interactive)
 - Processing (long-running tasks)

Outlook

- Integration of AI workflows (RF, CNNs)
- Build use case gallery
- Hosted public demo instance

We are looking for:

- Co-development & Co-innovation
- Projects & Consortiums
- ...

Get in touch.
